| 1.Publication date | 1/29/2021 | | | | | |
|--------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|-------------|---------------|---------|--------------|
| 2.Reference number | 003 | | | | | |
| 3.Category | OFFICE, SERVICE INDUSTRY AND HOUSEHOLD MACHINES | | | | | |
| 4.Purpose of disclosure | Presenting environmental impacts of a product life cycle using IDEA | | | | | |
| | RISO ComColor FT5231 (High-speed color inkjet) | | | | | |
| 5.Product information | https://www.riso.co.jp/english/ **This product has a scanner, which is excluded for this calculation | | | | | |
| 6.Contact information | https://www.riso.co.jp/english/form/home/inquiryconcerning/ | | | | | |
| 7.Results of life cycle impact assessment | Total | ①Raw material acquisition | ②Production | ③Distribution | @Use | ⑤End-of-Life |
| Global warming IPCC2013 GWP100a (kg-CO2eq) | 2.0E+03 | 1.0E+03 | 5.6E+01 | 7.9E+01 | 7.1E+02 | 1.6E+02 |
| Acidification (kg-SO2eq) | 1.3E+00 | 7.6E-01 | 2.1E-02 | 9.2E-02 | 2.4E-01 | 1.4E-01 |
| Resources consumption (kg-Sbeq) | 7.6E-01 | 7.4E-01 | 2.4E-04 | 2.2E-04 | 1.7E-02 | 1.6E-04 |
| Interpretation of results | -CO2 emitted the most in the raw material acquisition stage and the 2nd most in the use stageEnvironmental impacts from acidification and resource consumption showed a result similar to the CO2 result. | | | | | |
| 8.Secondary data used and its version | IDEA v2.1.3 | | | | | |

9. Stages targeted for the case study

①Raw material acquisition ②Production ③Distribution ④Use ⑤End-of-Life

10.Remarks

① Usage Conditions:

Printing a total of 2,190,000 sheets (A4 size) in monochrome and color modes

(However, environmental impact assessment is not included for manufacturing A4-size papers.)

- ②Mass of raw materials targeted for the case study: 224kg
- ③Targeted areas for stages: Japan for Raw material acquisition; Japan for Production; Japan and North America for Distribution; North America for Use; and North America for End-of-life
- 4Validity period for the case study $07/02/2020 \sim 07/01/2025$
- ⑤Conformity standard :ISO14040,ISO14044
- 60thers

Conformed environmental labels: ENERGY STAR Version 3.0, EcoLeaf environmental label program, and EPEAT

Assessment process: RISO KAGAKU CORPORATION's environmental impact assessment
